JOURNAL OF STATISTICAL PHYSICS

Vol. 98, Nos. 1/2 January 2000

CONTENTS

ARTICLES

Dynamics of a Ring of Diffusively Coupled Lorenz Oscillators 1
Krešimir Josić and C. Eugene Wayne

Lyapunov Exponent and Density of States of a One-Dimensional Non-Hermitian Schrödinger Equation 31
Bernard Derrida, Jesper Lykke Jacobsen, and Reuven Zeitak

Natural Nonequilibrium States in Quantum Statistical Mechanics 57
David Ruelle

Hamiltonian Derivation of a Detailed Fluctuation Theorem 77
C. Jarzynski

Distribution of Avalanche Sizes in the Hysteretic Response of the Random-Field Ising Model on a Bethe Lattice at Zero Temperature 103
Sanjib Sabhapandit, Prabodh Shukla, and Deepak Dhar

Universality and Conformal Invariance for the Ising Model in Domains with Boundary 131
Robert P. Langlands, Marc-André Lewis, and Yvan Saint-Aubin

The Dilute Potts Model on Random Surfaces 245
P. Zinn-Justin

Multilayer Cooperative Sequential Adsorption 265
E. K. O. Hellén, P. Szelestey, and M. J. Alava

Anchoring of Polymers by Traps Randomly Placed on a Line 281
S. Nechaev, G. Oshanin, and A. Blumen

Dimensions and Waiting Times for Gibbs Measures 305
Jean-René Chazottes

Monte Carlo Transition Dynamics and Variance Reduction 321
M. Fitzgerald, R. R. Picard, and R. N. Silver

Monte Carlo Study of Localization on a One-Dimensional Lattice 347
Hongyu Guo and Bruce N. Miller

What Can One Learn About Self-Organized Criticality from Dynamical Systems Theory 375
Ph. Blanchard, B. Cessac, and T. Krüger

Transport by Vector Fields with Kolmogorov Spectrum 405
Leonid Koralov

New Discrete Model Boltzmann Equations for Arbitrary Partitions of the Velocity Space 419
P. Reiterer, C. Reitshammer, F. Schürrer, F. Hanser, and T. Eitzenberger

Trend to Equilibrium of a Degenerate Relativistic Gas 441
C. Cercignani and G. M. Kremer

Decoherent Histories and Realism 457
Angelo Bassi and GianCarlo Ghirardi

Algorithmical Unsolvability of the Ergodicity Problem for Locally Interaction Processes with Continuous Time 495
André Toom

DEPARTMENTS

Book Review: *Monte Carlo Methods in Statistical Physics* 503
Harvey Gould

Errata: Statistical Entropy of a Lattice-Gas Model: Multiparticle Correlation Expansion 507
Santi Prestipino and Paolo V. Giaquinta

Future Contributions to *Journal of Statistical Physics* 511

JOURNAL OF STATISTICAL PHYSICS

Vol. 98, Nos. 3/4 February 2000

CONTENTS

ARTICLES

Equivalence of the Two Results for the Free Energy of the Chiral Potts Model 513
R. J. Baxter

Discontinuity of the Magnetization in Diluted $O(n)$-Models 537
Lincoln Chayes, Senya B. Shlosman, and Valentin A. Zagrebnov

Universal Amplitude Ratios in the Critical Two-Dimensional Ising Model on a Torus 551
Jesús Salas and Alan D. Sokal

Ground States of Lattice Gases with "Almost" Convex Repulsive Interactions 589
Janusz Jędrzejewski and Jacek Miękisz

A New Statistical Aspect of the Cluster Variation Method for Lattice Systems 621
Hiromu Asada

The Sixth-Moment Sum Rule for the Pair Correlations of the Two-Dimensional One-Component Plasma: Exact Result 639
P. Kalinay, P. Markoš, L. Šamaj, and I. Travěnec

The Upper Critical Dimension of the Abelian Sandpile Model 667
V. B. Priezzhev

Non-Hermitian Tridiagonal Random Matrices and Returns to the Origin of a Random Walk 685
G. M. Cicuta, M. Contedini, and L. Molinari

The Lifshitz Tail and Relaxation to Equilibrium in the One-Dimensional Disordered Ising Model 701
Elena Zhizhina

Lyapunov Instability for a Hard-Disk Fluid in Equilibrium and Nonequilibrium Thermostated by Deterministic Scattering 723
Christoph Wagner

On Some Properties of Kinetic and Hydrodynamic Equations for Inelastic Interactions 743
A. V. Bobylev, J. A. Carrillo, and I. M. Gamba

Hydrodynamic Lyapunov Modes in Translation-Invariant Systems 775
Jean-Pierre Eckmann and Omri Gat

Critical Behavior for Maximal Flows on the Cubic Lattice 799
Yu Zhang

Conductance and Statistical Properties of Chaotic and Integrable Electron Waveguides 813
Gursoy B. Akguc and L. E. Reichl

On the Convergence of the Boltzmann Equation for Semiconductors Toward the Energy Transport Model 835
N. Ben Abdallah, L. Desvillettes, and S. Génieys

Spinodal Decomposition for Multicomponent Cahn–Hilliard Systems 871
Stanislaus Maier-Paape, Barbara Stoth, and Thomas Wanner

Rigorous Estimates of the Tails of the Probability Distribution Function for the Random Linear Shear Model 897
Jared C. Bronski and Richard M. McLaughlin

Generalized Negative Binomial Distributions 917
J. Betancort-Rijo

SHORT COMMUNICATIONS

Scaling Properties of an Inviscid Mean-Motion Fluid Model 935
B. T. Nadiga

Equivalence Between Canonical Gibbs Measures and Stationary Measures for Stochastic Lattice-Gas Model 949
Hironobu Sakagawa

Similarity of Percolation Thresholds on the HCP and FCC Lattices 961
Christian D. Lorenz, Raechelle May, and Robert M. Ziff

Future Contributions to *Journal of Statistical Physics* 971

JOURNAL OF STATISTICAL PHYSICS

Vol. 98, Nos. 5/6 March 2000

CONTENTS

ARTICLES

Replica Symmetry Breaking in Short-Range Spin Glasses: Theoretical Foundations and Numerical Evidences 973
Enzo Marinari, Giorgio Parisi, Federico Ricci-Tersenghi, Juan J. Ruiz-Lorenzo, and Francesco Zuliani

Discrete Symmetry Breaking for Certain Short-Range Interactions 1049
M. Fukuyama

Distribution of Energies for the Two-Dimensional Ising Model 1063
Jacek Wojtkiewicz and Andreas Klümper

Sharp Phase Boundaries for a Lattice Flux Line Model 1075
C. Borgs, J. T. Chayes, C. King, and N. Madras

Cassie's Law and Concavity of Wall Tension with Respect to Disorder 1115
François Dunlop and Krzysztof Topolski

Dynamical Localization for the Random Dimer Schrödinger Operator 1135
Stephan De Bièvre and François Germinet

Flowing Sand—A Possible Physical Realization of Directed Percolation 1149
Haye Hinrichsen, Andrea Jiménez-Dalmaroni, Yadin Rozov, and Eytan Domany

Kinetic Theory of Area-Preserving Maps. Application to the Standard Map in the Diffusive Regime 1169
R. Balescu

Derivation of Maximum Entropy Principles in Two-Dimensional Turbulence via Large Deviations 1235
Christopher Boucher, Richard S. Ellis, and Bruce Turkington

On the Trend to Equilibrium for Some Dissipative Systems with Slowly Increasing *A Priori* Bounds 1279
G. Toscani and C. Villani

Large Deviations for Expanding Transformations with Additive White Noise 1311
S. C. Carmona and A. Lopes

A Modified Boltzmann Equation for Bose–Einstein Particles: Isotropic Solutions and Long-Time Behavior 1335
Xuguang Lu

On the Brazil Nuts Problem: Is It of Relevance to Hydrodynamics? 1395
Effat A. Saied

SHORT COMMUNCATION

A Remark on the Notion of Robust Phase Transitions 1409
Aernout C. D. van Enter

DEPARTMENTS

Book Review: *Nonequilibrium Phase Transitions in Lattice Models* 1417
Daniel ben-Avraham

Book Review: *Scaling Limits of Interacting Particle Systems* 1419
Ellen Saada

Book Review: *Molecular Thermodynamics* 1425
Rudi Podgornik

Book Review: *Ludwig Boltzmann: The Man Who Trusted Atoms* 1429
Stephen Brush

Future Contributions to *Journal of Statistical Physics* 1433

JOURNAL OF STATISTICAL PHYSICS

Vol. 99, Nos. 1/2 April 2000

CONTENTS

ARTICLES

Nonequilibrium Phase Transition in a Model of Diffusion, Aggregation, and Fragmentation 1
Satya N. Majumdar, Supriya Krishnamurthy, and Mustansir Barma

Asymmetric Particle Systems on $\mathbb{R}$ 31
J. Krug and J. Garcia

On the Effect of Stochastic Fluctuations in the Dynamics of the Lifshitz–Slyozov–Wagner Model 57
J. J. L. Velázquez

Shock Waves for a Discrete Velocity Gas Mixture 115
Carlo Cercignani and Henri Cornille

Classical Skew Orthogonal Polynomials and Random Matrices 141
M. Adler, P. J. Forrester, T. Nagao, and P. van Moerbeke

Ground State and Spin-Glass Phase of the Large-N Infinite-Range Spin Glass via Supersymmetry 171
M. B. Hastings

Diffraction of Random Tilings: Some Rigorous Results 219
Michael Baake and Moritz Höffe

Shell Analysis and Effective Disorder in a 2D Froth 263
Y. Feng and H. J. Ruskin

Wall-Induced Density Profiles and Density Correlations in Confined Takahashi Lattice Gases 273
J. Buschle, P. Maass, and W. Dieterich

Spectral Gaps of Quantum Hall Systems with Interactions 313
Tohru Koma

Insensitivity of Quantized Hall Conductance to Disorder and Interactions 383
Tohru Koma

Rigidity of Interfaces in the Falicov–Kimball Model 461
Nilanjana Datta, Alain Messager, and Bruno Nachtergaele

Positivity and Convergence in Fermionic Quantum Field Theory 557
Manfred Salmhofer and Christian Wieczerkowski

SHORT COMMUNICATIONS

Subdiffusive Quantum Transport for 3D Hamiltonians with Absolutely Continuous Spectra 587
J. Bellissard and H. Schulz-Baldes

Semi-Integral Scheme for Simulation of Langevin Equation with Weak Inertia 595
Jing-Dong Bao

Survival Probabilities for Discrete-Time Models in One Dimension 603
Makoto Katori, Norio Konno, and Hideki Tanemura

Poissonian Behavior of Ising Spin Systems in an External Field 613
A. Ganesh, B. M. Hambly, Neil O'Connell, Dudley Stark, and P. J. Upton

Future Contributions to *Journal of Statistical Physics* 627

JOURNAL OF STATISTICAL PHYSICS

Vol. 99, Nos. 3/4 May 2000

CONTENTS

ARTICLES

Height Representation, Critical Exponents, and Ergodicity in the Four-State Triangular Potts Antiferromagnet 629
Cristopher Moore and M. E. J. Newman

Internal Diffusion-Limited Aggregation: Parallel Algorithms and Complexity 661
Cristopher Moore and Jonathan Machta

A Comparison Between Broad Histogram and Multicanonical Methods 691
A. R. Lima, P. M. C. de Oliveira, and T. J. P. Penna

Continuity Conditions for the Radial Distribution Function of Square-Well Fluids 707
L. Acedo

Strict Positivity of a Solution to a One-Dimensional Kac Equation Without Cutoff 725
Nicolas Fournier

Soliton Solutions of Integrable Hierarchies and Coulomb Plasmas 751
Igor Loutsenko and Vyacheslav Spiridonov

Gaussian Limiting Behavior of the Rescaled Solution to the Linear Korteweg–de Vries Equation with Random Initial Conditions 769
Luisa Beghin, Viktoria P. Knopova, Nikolai N. Leonenko, and Enzo Orsingher

Statistics of "Worms" in Isotropic Turbulence Treated on the Multifractal Basis 783
Iwao Hosokawa

Synchronization Under Periodic Modulation of Symmetric Double Square Wells in a Bistable Stochastic System 799
Asish K. Dhara and S. R. Banerjee

On the Distribution of Long-Term Time Averages on Symbolic Space 813
Ai-Hua Fan and De-Jun Feng

The Gallavotti–Cohen Fluctuation Theorem for a Nonchaotic Model 857
S. Lepri, L. Rondoni, and G. Benettin

Asymptotic Behavior for the Liouville Equations 873
Christian Dogbé

Effective Potential for the Reaction-Diffusion-Decay System 903
David Hochberg, Carmen Molina-Paris, Juan Pérez-Mercader, and Matt Visser

Conserved Mass Models and Particle Systems in One Dimension 943
R. Rajesh and Satya N. Majumdar

A Class of Planar Discrete Velocity Models for Gas Mixtures 967
Henri Cornille and Carlo Cercignani

On the Milne Problem and the Hydrodynamic Limit for a Steady Boltzmann Equation Model 993
L. Arkeryd and A. Nouri

SHORT COMMUNICATIONS

Population Dynamics near an Oasis with Time-Dependent Convection 1021
T. Franosch and David R. Nelson

Exact Stationary States of a Two-Dimensional Transport Model 1031
D. J. Gates

Higher Order Quantum Onsager Coefficients from Dynamical Invariants 1037
K. Lendi

Exact Tracer Diffusion Coefficient in the Asymmetric Random Average Process 1045
Gunter M. Schütz

DEPARTMENTS

Book Review: *Thermal Physics* 1051
Irwin Oppenheim

Book Review: *A Practical Introduction to the Simulation of Molecular Systems* 1053
Richard W. Pastor

Program of the 82nd Statistical Mechanics Meeting 1057

Program of the Sixth Statistical Physics Days 1067

Call for Nominations for the 2001 Boltzmann Award 1071

Future Contributions to *Journal of Statistical Physics* 1073

JOURNAL OF STATISTICAL PHYSICS

Vol. 99, Nos. 5/6 June 2000

CONTENTS

ARTICLES

The Scaling Limit of the Incipient Infinite Cluster in High-Dimensional Percolation. I. Critical Exponents 1075
Takashi Hara and Gordon Slade

Coexistence of Partially Disordered/Ordered Phases in an Extended Potts Model 1169
M. Biskup, L. Chayes, and R. Kotecký

Transfer Matrix Spectrum and Bound States for Lattice Classical Ferromagnetic Spin Systems at High Temperature 1207
Ricardo S. Schor and Michael O'Carroll

Macroscopic Determinism in Noninteracting Systems Using Large Deviation Theory 1225
Brian R. La Cour and William C. Schieve

Microcanonical Finite-Size Scaling 1251
Michael Kastner, Michael Promberger, and Alfred Hüller

Decay of the Bethe–Salpeter Kernel and Bound States for Lattice Classical Ferromagnetic Spin Systems at High Temperature 1265
Ricardo S. Schor and Michael O'Carroll

Pressure and Maxwell Tensor in a Coulomb Fluid 1281
B. Jancovici

On Condensations in the Bogoliubov Weakly Imperfect Bose Gas 1297
J.-B. Bru and V. A. Zagrebnov

Thermostating by Deterministic Scattering: The Periodic Lorentz Gas 1339
K. Rateitschak, R. Klages, and G. Nicolis

Fluctuation-Induced First-Order Transition in a Nonequilibrium Steady State 1365
Klaus Oerding, Frédéric van Wijland, Jean-Pierre Leroy, and Hendrik Jan Hilhorst

SHORT COMMUNICATION

One-Dimensional Lattice Dynamics of the Diffusion-Limited Reaction $A + A \to A + S$: Transient Behavior 1397
Enrique Abad, Harry L. Frisch, and Gregoire Nicolis

DEPARTMENTS

Consistent Quantum Realism: A Reply to Bassi and Ghirardi 1409
Robert B. Griffiths

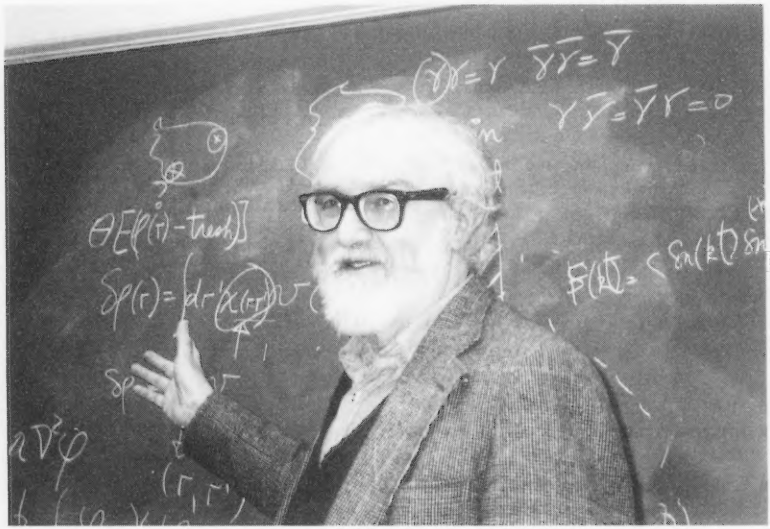
Consistent Quantum Realism: A Reply to Griffiths 1427
Angelo Bassi and GianCarlo Ghirardi

Future Contributions to *Journal of Statistical Physics* 1429

JOURNAL OF STATISTICAL PHYSICS

Vol. 100, Nos. 1/2 July 2000

SPECIAL ISSUE DEDICATED TO GEORGE STELL



CONTENTS

ARTICLES

Preface 1
Joel L. Lebowitz, Oliver Penrose, Salvatore Torquato, and Robert Ziff

Demixing in Isotropic Binary Mixtures of Rodlike Macromolecules 3
P. C. Hemmer

Fluctuations-Inclusive Approach to Phase Transitions in Binary Mixtures 13
D. Pini, A. Parola, and L. Reatto

An Integral Equation Theory for the Widom–Rowlinson Mixture 39
Arun Yethiraj and George Stell

Triangle Distribution and Equation of State for Classical Rigid Disks 49
Dorothea K. Stillinger, Frank H. Stillinger, Salvatore Torquato, Thomas M. Truskett, and Pablo G. Debenedetti

"Magic Relation" Between the Structures of Coexisting Phases at a First-Order Phase Transition in a Hard Sphere System 73
Howard Reiss

Close to Close Packing 89
Oliver Penrose and George Stell

Applications of the Stell–Hemmer Potential to Understanding Second Critical Points in Real Systems 97
A. Scala, M. R. Sadr-Lahijany, N. Giovambattista, S. V. Buldyrev, and H. E. Stanley

Determining Liquid Structure from the Tail of the Direct Correlation Function 107
Kirill Katsov and John D. Weeks

Molecular Fluids at High Dimensionality 135
A. Yukhimets, H. L. Frisch, and J. K. Percus

Overlapping Associating Fluids with Directional Bonds in a Bulk and Near a Hard Wall: Monte Carlo Study 153
Douglas Henderson, Ian Garcia, Stefan Sokołowski, and Andrij Trokhymchuk

Applications of Integral Equation Calculations to High-Tempurature Solvation Phenomena 167
A. A. Chialvo, P. G. Kusalik, Yu. V. Kalyuzhnyi, and P. T. Cummings

A Sum Rule for the Two-Dimensional Two-Component Plasma 201
B. Jancovici

Charge Fluctuations in the Two-Dimensional One-Component Plasma 209
D. Levesque, J.-J. Weis, and J. L. Lebowitz

The Casimir Problem of Spherical Dielectrics: A Solution in Terms of Quantum Statistical Mechanics 223
J. S. Høye and I. Brevik

The Pauli Principle and the Restricted Primitive Model 233
George A. Baker, Jr., and J. D. Johnson

Highly Asymmetric Electrolytes in the Associative Mean-Spherical Approximation 243
Yu. V. Kalyuzhnyi, M. F. Holovko, and V. Vlachy

A Model for Polyelectrolytes 267
N. von Solms and Y. C. Chiew

Long-Time-Tail Effects on Lyapunov Exponents of a Random, Two-Dimensional Field-Driven Lorentz Gas 279
D. Panja, J. R. Dorfman, and Henk van Beijeren

Computer Simulation of Irreversible Expansion *via* Molecular Dynamics, Smooth Particle Applied Mechanics, Eulerian, and Lagrangian Continuum Mechanics 313
Wm. G. Hoover, H. A. Posch, V. M. Castillo, and C. G. Hoover

The Kinetic Theory of Simple Reacting Spheres: I. Global Existence Result in a Dilute-Gas Case 327
Jacek Polewczak

Kinetic Arrest Originating in Competition Between Attractive Interaction and Packing Force 363
G. Foffi, E. Zaccarelli, F. Sciortino, P. Tartaglia, and K. A. Dawson

Analytic Approximations for the Velocity of Field-Driven Ising Interfaces 377
Per Arne Rikvold and M. Kolesik

Dissipative Dynamics and the Statistics of Energy States of a Hookean Model for Protein Folding 405
Erkan Tüzel and Ayşe Erzan

A Self-Consistent Ornstein–Zernike Approximation for the Edwards–Anderson Spin-Glass Model 423
E. Kierlik, M. L. Rosinberg, and G. Tarjus

The Explicit Density Functional and Its Connection with Entropy Maximization 445
Phil Attard

The Renormalization Group and Optimization of Entropy 475
A. Robledo

Future Contributions to *Journal of Statistical Physics* 489

JOURNAL OF STATISTICAL PHYSICS

Vol. 100, Nos. 3/4 August 2000

CONTENTS

ARTICLES

Gaussian Fluctuation for the Number of Particles in Airy, Bessel, Sine, and Other Determinantal Random Point Fields 491
Alexander B. Soshnikov

Limiting Distributions for a Polynuclear Growth Model with External Sources 523
Jinho Baik and Eric M. Rains

Fokker–Planck Equations as Scaling Limits of Reversible Quantum Systems 543
Francois Castella, László Erdős, Florian Frommlet, and Peter A. Markowich

Anomalous Diffusion Limit Induced on a Kinetic Equation 603
Christian Dogbe

Virtues and Limitations of Markovian Master Equations with a Time-Dependent Generator 633
A. J. van Wonderen and K. Lendi

Bounds on the Growth of the Velocity Support for the Solutions of the Vlasov–Poisson Equation in a Torus 659
Emanuele Caglioti and Carlo Marchioro

Self-Similar Decay in the Kraichnan Model of a Passive Scalar 679
Gregory L. Eyink and Jack Xin

SHORT COMMUNICATIONS

Probabilistic Estimates for the Two-Dimensional Stochastic Navier–Stokes Equations 743
J. Bricmont, A. Kupiainen, and R. Lefevere

A Remark on the Equivalence of Isokinetic and Isoenergetic Thermostats in the Thermodynamic Limit 757
David Ruelle

A Simple Inductive Approach to the Problem of Convergence of Cluster Expansions of Polymer Models 765
Anton Bovier and Miloš Zahradnik

New Exact Ground States for One-Dimensional Quantum Many-Body Systems 779
Thomas Koprucki and Heinz-Jürgen Wagner

Zero-Dimensional Spectral Measures for Quasi-Periodic Operators with Analytic Potential 791
S. Jitomirskaya and M. Landrigan

DEPARTMENTS

Book Review: *Nonequilibrium Phase Transitions in Lattice Models* 797
Enrique Abad

Book Review: *An Introduction to Econophysics, Correlations, and Complexity in Finance* 801
Jaume Masoliver

Future Contributions to *Journal of Statistical Physics* 803

JOURNAL OF STATISTICAL PHYSICS

Vol. 100, Nos. 5/6 September 2000

CONTENTS

ARTICLES

Random-Cluster Representation for the Blume–Capel Model 805
M. B. Bouabci and C. E. I. Carneiro

Quantum n-Vector Anharmonic Crystal II: Displacement Fluctuations 829
N. Angelescu, A. Verbeure, and V. A. Zagrebnov

LRO in Lattice Systems of Linear Classical and Quantum Oscillators. Strong Nearest-Neighbor Pair Quadratic Interaction 853
W. I. Skrypnik

On the Distribution of Overlaps in the Sherrington–Kirkpatrick Spin Glass Model 871
M. Ledoux

Ising Models on Hyperbolic Graphs II 893
C. Chris Wu

Numerical Simulations of Screened Coulomb Systems. A Comparison Between Hyperspherical and Periodic Boundary Conditions 905
J. M. Caillol and D. Gilles

Monte Carlo Simulations of the Yukawa One-Component Plasma 933
J. M. Caillol and D. Gilles

Microscopic Calculation of the Dielectric Susceptibility Tensor for Coulomb Fluids 949
L. Šamaj

Random Sequential Adsorption: Relationship to Dead Leaves and Characterization of Variability 969
Dietrich Stoyan and Martin Schlather

Is There an Optimal Substrate Geometry for Wetting? 981
J. De Coninck, S. Miracle-Solé, and J. Ruiz

Exact Determination of the Phase Structure of a Multi-Species Asymmetric Exclusion Process 999
M. Khorrami and V. Karimipour

Limit Sets of Cellular Automata Associated to Probability Measures 1031
Petr Kurka and Alejandro Maass

Stieltjes Integrals of Hölder Continuous Functions with Applications to Fractional Brownian Motion 1049
A. A. Ruzmaikina

Fractional Brownian Motions and Enhanced Diffusion in a Unidirectional Wave-Like Turbulence 1071
Albert Fannjiang and Tomasz Komorowski

Efficient Numerical Solution of Stochastic Differential Equations Using Exponential Timestepping 1097
Kalvis M. Jansons and G. D. Lythe

Bilocal Dynamics for Self-Avoiding Walks 1111
Sergio Caracciolo, Maria Serena Causo, Giovanni Ferraro, Mauro Papinutto, and Andrea Pelissetto

Heat Conduction in Two-Dimensional Nonlinear Lattices 1147
Andrea Lippi and Roberto Livi

DEPARTMENTS

Program of the 83rd Statistical Mechanics Meeting 1173

Future Contributions to *Journal of Statistical Physics* 1179

JOURNAL OF STATISTICAL PHYSICS

Vol. 101, Nos. 1/2 October 2000

SPECIAL ISSUE DEDICATED TO GRÉGOIRE NICOLIS
ON THE OCCASION OF HIS SIXTIETH BIRTHDAY

PROCEEDINGS OF THE NATO ADVANCED RESEARCH WORKSHOP
"NONLINEAR SCIENCE: DYNAMICS AND STOCHASTICITY,"
BRUSSELS, JUNE 30–JULY 3, 1999

CONTENTS

ARTICLES

Preface 1
F. Baras, P. Gaspard, M. Malek Mansour, M. Mareschal, T. Tél, C. Van den Broeck, and Joel L. Lebowitz

Positivity of Entropy Production 3
Christian Maes and Frank Redig

Note on the Kaplan–Yorke Dimension and Linear Transport Coefficients 17
Denis J. Evans, E. G. D. Cohen, Debra J. Searles, and F. Bonetto

Properties of Stationary Nonequilibrium States in the Thermostatted Periodic Lorentz Gas I: The One Particle System 35
F. Bonetto, D. Daems, and J. L. Lebowitz

The Nosé–Hoover Thermostated Lorentz Gas 61
K. Rateitschak, R. Klages, and Wm. G. Hoover

Modeling Thermostating, Entropy Currents, and Cross Effects by Dynamical Systems 79
Jürgen Vollmer, Tamás Tél, and László Mátyás

Transient Chaos and Critical States in Generalized Baker Maps 107
Z. Kaufmann and P. Szépfalusy

Entropy Production and Transports in a Conservative Multibaker Map with Energy 125
S. Tasaki and P. Gaspard

Density-Dependent Diffusion in the Periodic Lorentz Gas 145
R. Klages and Christoph Dellago

Microscopic Chaos and Reaction-Diffusion Processes in the Periodic Lorentz Gas 161
I. Claus and P. Gaspard

Active Control of Molecular Dynamics: Coherence Versus Chaos 187
Stuart A. Rice

Control of Wave Packet Revivals Using Geometric Phases 213
S. Seshadri, S. Lakshmibala, and V. Balakrishnan

Non-Adiabatic Dynamics in Mixed Quantum-Classical Systems 225
Steve Nielsen, Raymond Kapral, and Giovanni Ciccotti

Langevin Equation of Collective Modes of Bose–Einstein Condensates in Traps 243
Robert Graham

Integrable Limits of Dynamics in Trapped Bose-Condensates 259
András Csordás

Presence of Energy Flux in Quantum Spin Chains: An Experimental Signature 273
Z. Rácz

On the Level Spacing Distribution in Quantum Graphs 283
F. Barra and P. Gaspard

On Two-Dimensional Area-Preserving Diffeomorphisms with Infinitely Many Elliptic Islands 321
S. V. Gonchenko and L. P. Shilnikov

Dynamical Phenomena Near a Saddle-Focus Homoclinic Connection in a Hamiltonian System 357
L. M. Lerman

Hyperbolicity and Astigmatism 373
Leonid A. Bunimovich

Asymptotics of High Order Noise Corrections 385
Niels Søndergaard, Gergely Palla, Gábor Vattay, and André Voros

Asymptotic Behaviour for Critical Slowing-Down Random Walks 397
Yves Elskens

Random Walks on a Fractal Solid 405
John J. Kozak

Stokes' Drift: A Rocking Ratchet 415
I. Bena, M. Copelli, and C. Van den Broeck

Microscopic Simulation of Limit Cycle Behavior in Spatially Extended Systems 425
M. Malek Mansour, J. Dethier, and F. Baras

Nonlinear Dynamics and Fluctuations of Dissipative Toda Chains 443
W. Ebeling, U. Erdmann, J. Dunkel, and M. Jenssen

Most Probable Histories for Nonlinear Dynamics: Tracking Climate Transitions 459
G. L. Eyink and J. M. Restrepo

Excitable Structures in Stochastic Bistable Media 473
J. García-Ojalvo and L. Schimansky-Geier

Universal Character of Stochastic Resonance and a Constructive Role of White Noise 483
A. Fuliński and P. F. Góra

Reaction–Diffusion Patterns in Confined Chemical Systems 495
P. De Kepper, E. Dulos, J. Boissonade, A. De Wit, G. Dewel, and P. Borckmans

Recent Theoretical Developments on the Formation of Liesegang Patterns 509
Michel Droz

Spatial Unfolding of Elementary Bifurcations 521
P. Coullet, E. Risler, and N. Vandenberghe

Nearly Vertical Hopf Bifurcation for a Passively Q-Switched Microchip Laser 543
Thomas Erneux and Gregory Kozyreff

Asymptotic Description of a Viscous Fluid Layer 553
Enrique Cerda, René Rojas, and Enrique Tirapegui

Simulating 2D Flows with Viscous Vortex Dynamics 567
J. Bene, S. Bröcheler, and H. Lustfeld

Selection of an Attractor in a Continuum of Stable Solutions: Descriptions of a Wave Front at Different Scales 579
A. Lemarchand

Nanoscale Wave Patterns in Reactive Adsorbates with Attractive Lateral Interactions 599
M. Hildebrand and A. S. Mikhailov

Dynamics of Adsorbate Islands with Nanoscale Resolution 621
Norbert Kruse, Christian Voss, Valentin Medvedev, Christopher Bodenstein, David Hanon, and Jean Pierre Boon

Surface Restructuring, Kinetic Oscillations, and Chaos in Heterogeneous Catalytic Reactions 631
V. P. Zhdanov and B. Kasemo

Entrainment Versus Chaos in a Model for a Circadian Oscillator Driven by Light-Dark Cycles 649
Didier Gonze and Albert Goldbeter

A Simple Generalized Excitability Model Mimicking Salient Features of Neuron Dynamics 665
A. Giaquinta, M. Argentina, and M. G. Velarde

Beyond Storage Capacity in a Single Model Neuron: Continuous Replica Symmetry Breaking 679
G. Györgyi and P. Reimann

DEPARTMENTS

Abstract: *Stochastic Adiabatic Wall* 703
Jaroslaw Piasecki

Abstract: *Properties of Some Chaotic Billiards with Time-Dependent Boundaries* 705
A. Loskutov and A. B. Ryabov

Abstract: *(Anti)coherence and (Anti)persistence in Natural and Mathematical Time Series* 707
Marcel Ausloos

Abstract: *Statistical Dynamics of Clustering in the Genome Structure* 709
A. Provata and Y. Almirantis

Future Contributions to *Journal of Statistical Physics* 711
